DESCRIPTION

Elite Flat Panel Wainscoting Accent Kit, 5ft wide, 95" high, suitable for an overall wainscot height of between 90" and 100". The 95" height can be reduced by cutting down the rails or increased by adding crown moulding or baseboards. The kit consists of all the rails and parts shown in the illustration. The horizontal rails are made from primed MDF and the cap and shoe trims are made from primed, finger-jointed Poplar for better impact and protection against moisture. The primed, MDF flat panels are deliberately made extra wide, simply cut off the material that you do not require to customize on the job site to suit any layout.
